

# BOOT SIZING GUIDE

CANADA POOCH®

## For Small to Medium Dog Paws

## For Large to Extra Large Dog Paws

### HOW TO SIZE

To ensure the coziest fit for your dog, use the above paw outlines to help you measure from the bottom of the heel pad to the tip of the longest toenail.

### CAUGHT BETWEEN SIZES?

It's best to size up with the larger size for extra wiggle room. If you're still unsure which size is right for your dog, use the rulers provided to measure your dog's paw and check against the size chart for the best match.

### PAW LENGTH

With your dogs paw flat to the ground, measure their paw from their nails to where they are no longer touching the ground.

### PAW WIDTH

With your dogs paw flat to the ground, measure their paw from edge to edge.

### LEG LENGTH (SUSPENDER BOOTS ONLY)

Boot sizes are available for **REGULAR** and **SHORT** leg lengths. To determine if your dog requires a short or regular size, it is best practice to measure their leg length from the base of their paw to their underbelly. Your dog should be standing on all four paws for this measurement. For dogs with long backs such as Corgis or Dachshunds, we recommend our Soft Shield Boots instead of the Suspender Boots SHORT sizing.
